

TEMBAN BLAISE AYIM

Software Engineer – Odoo Backend & Full-Stack Developer

Professional Experience

ShinTheo – Software Engineer (Full-time)

April 2022 – May 2024 · Belgium (Remote)

Major Projects

1. HubColis (formerly HubKilo)

Multi-modal Parcel Shipping Platform

Role: Odoo Backend Developer & REST API Engineer

- Developed 6 custom Odoo modules for shipping, payments, and dashboards.
- Built REST APIs for web/mobile (tracking, QR validation, geolocation).
- Implemented cron jobs for automation.

Results: +25% efficiency, +30% engagement, -40% manual work.

2. WillOnHair

Salon Appointment & POS System

Role: Odoo Backend Developer & REST API Engineer

- Built full custom Odoo module.
- Developed APIs for mobile, web, POS.
- Implemented role-based access and payment logic.

Results: Reduced no-shows, improved efficiency.

3. RPN (Mutual Aid System)

Role: Odoo Developer & API Engineer

- Built microfinance system with parent/child accounts.
- APIs for recharge, balance, account management.

Results: Reliable financial tracking system.

4. DGA Express

Role: Vue.js Frontend Developer

- Built frontend for logistics & marketplace platform.
- Integrated payments (CinetPay) and messaging.

5. Amelia WordPress Plugin

Role: Plugin Developer

- Built bidirectional sync plugin (Amelia ↔ external system).
- Automated synchronization and admin monitoring.

Results: -90% manual reconciliation.

Technical Stack:

Odoo, Python, PostgreSQL, Java Spring Boot, Vue.js, WordPress, REST APIs, Git, Linux
